Filed: January 23, 2001
RESPONSE

antibody fragments immunoreactive with anti-dsDNA antibodies, wherein the antibody fragments prevent the anti-dsDNA antibodies from interfering with protein synthesis.

2. (amended) The method of claim 1 wherein the antibody fragments are derived

from human antibodies.

3. (amended) The method of claim 1 wherein the antibody fragments are

conjugated to a carrier molecule or is a fusion protein.

Please cancel claim 4.

5. (amended) The method of claim 1 wherein the antibody fragment is derived from

an anti-idiotypic antibody immunoreactive with anti-dsDNA antibody.

8. (amended) A therapeutic composition in a pharmaceutically acceptable carrier for administration to a patient comprising an effective amount of single chain anti-idiotypic

antibody fragments immunoreactive with anti-dsDNA antibodies, wherein the antibody fragments prevent the anti-dsDNA antibodies from interfering with protein synthesis.

9. (amended) The composition of claim 8 wherein the antibody fragments are derived from human antibody.

10. (amended) The composition of claim 8 wherein the antibody fragments are conjugated to a carrier molecule or is a fusion protein.

Please cancel claim 11.

12. (amended) The composition of claim 8 wherein the composition is an antibody fragment derived from an anti-idiotypic antibody immunoreactive with anti-dsDNA antibody.
